MAKE YOUR OWN SLIME

What You Need:

- White craft glue or glue gel
- Borax (find it in the laundry detergent aisle)
- Water
- Two bowls
- Green Food coloring

What You Do:

1. In one bowl mix 1/2 cup (4 oz) glue and 1/2 cup water. Add food coloring
2. In another bowl, mix 1 teaspoon borax and 1 cup water to dissolve the borax
3. Add the glue mixture to the borax solution, stirring slowly
4. The slime will begin to form immediately; stir as much as you can, then dig in and knead it with your hands until it gets less sticky. (No one makes slime without getting a little messy!) Don't worry about any leftover water in the bowl; just pour it out
5. Store it in a plastic bag in the fridge, to keep it from growing mold
